

Integrate Azure Search in your Web Application

Marco De Sanctis - @crad77 – crad@aspitalia.com

Agenda

- ▶ How do I make my website's search rock in 60 minutes?

What's Azure Search

- ▶ PaaS Search Engine
- ▶ Internally based on Elastic Search
 - ▶ Document store
- ▶ Provides high end features for searching
 - ▶ Full text, sort by relevance, facets filtering, geospatial data, language analysers, suggestions, etc...
 - ▶ Super fast!
- ▶ Slider scalable
 - ▶ Throughput
 - ▶ Storage

How do I use it?

- ▶ Create an instance
- ▶ Define an index
- ▶ Fill it with data
- ▶ Keep it in sync with your main data source
- ▶ Query it!
 - ▶ RESTful API
 - ▶ .NET Client SDK

Thanks!! 😊
